DidySnap[®] by DIDYMOS[®]

Adjustable Headrest

Drawstring to attach headrest to shoulder straps for older children

Drawstring to set headrest for newborn and smaller babies

Ergonomically Shaped Back Panel

The panel is made of fabric with a diagonal stretch and is designed to mould to your child's anatomy and support her/his back.

Padded Shoulder Straps

Buckle on the Back

Variable height adjustment

Elastic Loops

After you set your straps, you can tie up the loose webbing with handy elastic loops

Adjustable Seat Height

For newborn babies, use the lower buckle (M-Buckle) in order to maintain the baby's naturally rounded back.

For older children, use the buckle on the side of the panel.

M-shaped Buckle

When you use the side panel buckles for your older children, the M-Buckle can be easily removed.

Important: If you reattach it, the ends always have to point downwards (M-direction).

Adjustable Seat Width

The width of the seat can be adjusted individually.

Movable Pads

For best in class carrying comfort, position the pads to suit your needs.

Padded Leg Protection

Padded Waist Belt

With adjustable strap length.

Safety Elastic

Make sure to always thread the buckle through the safety elastic before you fasten it.
